### GENERAL DESCRIPTION

The DAMPSLS and DAMPSLB low pressure modulating damper was developed for precise control of supply air in the HVAC duct system. Rigid aluminum components provide a strong, yet lightweight construction. The damper actuator with built-in LED lights is designed for years of care-free operation. The modulating design guarantees precise control of supply air into each zone. Long-life nylon gears drive the opposed blades open and closed. Opposed blade design reduces turbulence in the air stream. 30 Second operation to full open or closed position. 15 second operation to full open or closed position. End of shaft marked with high-visibility blade position indicator. Custom sizes are available.
